**Re: “Nurse Practitioners’ Regulations related to the Controlled Drugs and Substances Act” e-learning event**

Dear Nurse Practitioner Registrant,

Unfortunately, due to unexpected circumstances, we must re-schedule the e-learning event from September 12<sup>th</sup> 2008 to October 28<sup>th</sup>, 2008. We have had to find a replacement for the Keynote Speaker and as such, the event will be delayed in order to provide the replacement instructor additional time for preparation.

We do apologize for this change and the difficulties it may present for you. Registration will be open Friday, September 5, 2008. As this is a closed event, a username and password are required to register. The username and password are as follows:

Username: cne  
Password: elearning

Upon completion of registration, you will receive a pre-course study manual via Canada Post in October. Two weeks prior to the event, a registrant letter will be sent to you via e-mail with additional event details.

**Deadline for registration is September 30, 2008**

If you choose to complete the program via self-study, please contact Continuing Nursing Education at the above contact information and a DVD and workbook will be sent to you after the e-learning event in October. The DVD will contain a video taped copy of the e-learning day.

Information about the online exam will be included in the pre-course study manual.

I want to thank you for your interest in this program being planned by the College of Nursing. We hope that this change will also accommodate a number of individuals who have inquired about late registration for this event.

Thank you for your understanding and patience.

Sincerely,

Patricia A. Wall,  
Associate Professor and  
Director, Continuing Nursing Education
